

ABOUT ME

Currently, I'm responsible for the whole process of project development.

The biggest of my project is a cloud-based CRM/ERP system working on a SaaS model.

My role in this project changed from QA (2015 year) and Automation QA (2017 year) to Project Manager (2018 - now).

Main achievements:

- My team has grown from 3 people to 9 people in the last 2 years,
- The number of active clients has grown from 5 to 20;
- Implemented Agile methodology (which helped us to grow so fast);
- Developed QA Processes from scratch;
- Moved all communication to Jira (fixed almost all misunderstanding / miscommunications issues);
- No security incidents.

Experience

PROJECT MANAGER

GetCode

Oct 2018 – present

A cloud CRM/ERP system working on SaaS model.

My typical workday begins by checking the results of automation testing.

Next, I have a meeting with the team where we discuss plans for today.

During the day I collaborate with our developers, explain them new tasks if needed, check statuses and progress of tasks.

Also, I prepare reports for our customers and hold meetings with them, where I show our progress and discuss new tasks.

And I plan a development process and distribute tasks among the dev team.

QA AUTOMATION ENGINEER

GetCode

Mar 2017 - Oct 2018

Technologies and Tools:

Laravel Dusk, Behat, Selenium, Jenkins

QUALITY ASSURANCE ENGINEER

GetCode

Dec 2015 - Mar 2017
